Tests

Tuberculin Test Date: / / Mantoux Results	Positive	Negative	mm				
TB Tests are at the physician's discretion. Acceptable tests include Mantoux or other federally approved test.							
If positive, or if x-ray ordered, attach physician's statement documenting treatment and follow-up.							
Lead Screening Date: / /							
Attach lead level statement							
Lead Screening (Include All Dates and Results)							
1 year / / Result:	mcg/dL	Venous	Capillary				
2 years / / Result:	mcg/dL	U Venous	Capillary				
Most recent date of lead screening (if different from above):							
/ / Result:	mcg/dL	U Venous	Capillary				
Per NYS law, a blood lead test is required at 1 and 2 years of age and whenever risk of lead poisoning is likely. If the child has not been tested for lead, the day care provider may not exclude the child from child day care, but must give the parent information on lead poisoning and prevention, and refer the parent to their health care provider or the county health department for a lead blood screeping test.
